Professional Summary:

Full-Stack Web Developer, specializing in Front-End Development, with experience in digital transformation, IT governance, process modernization, and strategic support for public management at the Angra dos Reis City Hall. Capable of analyzing scenarios, proposing technological solutions, coordinating software projects, and integrating systems, applications, and digital platforms.

Hard Skills:

Web Technologies: HTML5, CSS3, Bootstrap, Sass, Tailwind CSS, WordPress, Elementor, JavaScript ES6, jQuery, PHP, Laravel, MariaDB/MySQL, APIs REST, JSON and AJAX.

Architecture and Development: MVC, database modeling, systems integration, responsive development, UI/UX, and technical documentation.

Infrastructure: Linux, Apache, hosting, deployment, and environment management.

Version Control: Git and GitHub.

Tools: VS Code, Cursor AI, Google Antigravity, Claude, Laragon, Base44, Google A.I. Studio.

Management and Governance: Digital transformation, project management, and requirements gathering.

AI and Automation: Productivity, prompt engineering, process automation, and development support.

Soft Skills:

Problem-solving

Critical analysis

Planning

Organization

Leadership

Decision-making

Autonomy

Adaptability

Fast learning

Task prioritization

Objective communication

Analytical thinking

Proactivity

Professional background in IT:

02/2026 to the present:

Technological Innovation Advisor (Angra dos Reis City Hall):

- I provide strategic and advisory support to the Secretariat for Modernization and Personnel Management, through the Superintendency of Digital Transformation, directly contributing to decision-making and the enhancement of Information Technology in municipal administration.
- I analyze the external environment and prospect technological solutions, resources, and trends aligned with the needs of public management.
- I propose, monitor, and support the implementation of methodologies, systems, databases, applications, and digital platforms.
- I coordinate and articulate integrated digital governance actions, promoting the modernization of processes and the efficient integration of institutional demands.
- I identify opportunities for continuous improvement, propose adjustments to processes and procedures, and collaborate on strategic ICT projects.
- I prepare technical documentation, reports, incident records, problem logs, and proposed solutions, supporting the control, management, and evolution of the municipality's technological services.
- I provide technical and software development support.

05/2022 to 02/2026:

Technical Coordinator for Development and Programming (Angra dos Reis City Hall):

- I translated designs into clean, functional code and created layouts from scratch, focusing on intuitive UI and excellent UX.
- I developed responsive interfaces using HTML, CSS, Bootstrap, and JavaScript, ensuring cross-browser compatibility.
- I followed architectural patterns such as MVC using Laravel PHP to enable efficient API integrations, optimal project organization, performance, and scalable architecture.
- I oversaw IT contracts.
- I planned, coordinated, and supported development projects, meeting deadlines and user requirements.
- I led team activities and implemented solutions to streamline workflows and optimize processes.

04/2021 to 05/2022

Information Technology Intern (Angra dos Reis City Hall):

- I resolved problems and performed hardware maintenance in the Technical Support department.
- I developed front-end solutions using HTML, CSS, and Bootstrap, contributing to the development of web systems.
- I assisted with back-end integrations and server-side processes.

Education:

Bachelor's Degree in Information Systems:

UNESA, Angra dos Reis, RJ, Brazil

Expected Graduation: Second Semester of 2026.

Languages:

English (Intermediate - B1)

Relevant Certificates:

Rocketseat Intermediate: Hands-on experience with ReactJS, TypeScript, advanced SQL, asynchronous JavaScript, API development, and CSS animations.

Rocketseat Basic: Advanced web development skills with HTML, CSS, JavaScript, NodeJS, SQL, OOP, functional programming, and Git for version control.

Rocketseat Beginner: Covered fundamental concepts of programming, computer systems, internet infrastructure, and web applications.
